

KROMER

The Kromer AFM™ 100 is the work horse of field maintenance. It is built for ease of use and built to last. Customize the B100 to meet your athletic field needs.

AFM Model B-100

athletic field maintainer

feature, specifications, & options

THE AFM™ 100 FEATURES:

- » An all steel 2" square tube welded frame with diamond platform fenders
- » A 10 Amp, 12 volt electric start, heavy duty electrical system which is reliable under all climatic conditions
- » A high quality Eaton hydrostatic transmission with single pedal operation, allowing the operator to go forward or reverse, totally eliminating the need to shift gears
- » Front tires that toe in to allow greater painting accuracy under all field conditions
- » A Peerless Axle system which provides greater stability for steering and striping straighter lines
- » A tank and seat assembly system that can be removed to allow total access to the engine
