

# KROMER

*Our Mixing Station  
transports easily,  
stores ready-to-use  
paint for weeks  
and connects  
to your 110V outlet*

## paint mixing station

## feature, specifications, & options

### The PAINT MIXING STATION features:

- » 175 or 300 gallon capacity, cone shaped tank ensures maximum drainage of the system
- » Direct paint transfer to painting equipment at the rate of 10 gpm
- » "Set and Forget" electronically controlled automatic agitation cycle so you can leave the station unattended, creating time for other duties
- » Built in water fill monitor for accurate paint mixing ratios
- » Quick coupler on the fill hose conveniently attaches to your Kromer AFM Painter™
- » "Easy Clean" bucket rinse system minimizes paint waste
- » Ultra-fine paint filtration system prevents paint contamination
- » Automated tank cleaning cycle ensures a fresh start with every batch

### KROMER PAINT MIXING STATION Specifications:

- 2" heavy-duty welded tubing
- Diamond floor plate
- Leeson heavy-duty mixing motor
- Hypro Direct Drive Versa Twin transfer pump and motor
